LANGUAGES

Bulgarian	Native
English	Fluent

CORE STACK

`Python` `Django` `PostgreSQL` `Angular` `JavaScript` `N8N` `Docker` `Git`

PROFILE

Python full-stack developer (SoftUni diploma), most recently working as an **AI Researcher**, building AI agents from scratch in pure Python, RAG pipelines, and N8N workflow automations. Comfortable across the stack — **Django / PostgreSQL** on the backend, **Angular** on the front — and on the AI side using **Pinecone**, with some familiarity with AI-assisted coding tools like Claude Code and Cursor. Currently looking for my next opportunity.

EXPERIENCE

AI Researcher — Programming & Automation · Edamame Digital

03/2025 – 01/2026 · Sofia, BG

Designed and built AI agents from scratch in pure Python (no framework), integrated through OAuth2-secured REST APIs. Implemented semantic search / RAG pipelines with the Pinecone vector database and embeddings. Built internal websites and workflow automations with N8N, using AI-assisted coding tools to accelerate delivery.

`AI Agents` `Pure Python` `Pinecone` `Embeddings / RAG` `OAuth2` `REST APIs` `N8N`

AI & AUTOMATION TOOLING

`AI Agent Orchestration (Pure Python)` `Pinecone` `Embeddings / RAG` `OAuth2` `REST APIs` `N8N Automation` `Claude Code` `Cursor` `Prompt Engineering`

SKILLS

`Python` `Django` `Flask` `OOP` `PostgreSQL` `SQLite` `JavaScript` `HTML5` `CSS` `Angular` `AngularJS` `Docker` `Terraform` `MongoDB` `Express` `Git`

EDUCATION

Python Full-Stack Developer — Professional Diploma 01/2021 – 05/2024
Software University (SoftUni), Sofia, Bulgaria

Software Engineer with Python — Diploma 03/2024
Software University (SoftUni), Sofia, Bulgaria

CERTIFICATES

Python Web Framework (Django) — 6.00/6.00 06/2023

JS Front-End — 6.00/6.00 10/2023

Containers and Cloud — 6.00/6.00 01/2024

Software Engineering and DevOps — 6.00/6.00 02/2024

Angular — 5.94/6.00 02/2024

PERSONAL PROJECTS

AI & AUTOMATION

Property Listings Generator
Python/Flask tool that extracts property data from SQLite, PostgreSQL, MySQL, SQL Server or MongoDB, translates Bulgarian to English, and generates PDF reports via a CLI or web interface · 2025

LLM Article Summarizer
Python tool that fetches an article by URL, summarizes and titles it using a Llama model via Hugging Face, with optional translation · 2025

FULL-STACK WEB APPS

Broffice LIVE www.broffice.bg
Full-stack Django + React e-commerce platform for a Bulgarian retailer, live in production with real customers. Dual pricing engine, promotions, self-hosted CI/CD · 2026

Portfolio Website
Django + HTML/CSS personal portfolio site showcasing projects and certifications · 2025

Movie Website (Angular)
Angular front-end, MongoDB + Express back-end · 03/2024 – 04/2024
